

Customer Journey Mapping

Persona 1
Arjun
Junior Risk Analyst (Novice)

Key Attribute

- **Detail-Oriented:** Focused on daily data verification and report preparation.
- **Learner:** Has 1–2 years of experience and is still building familiarity with advanced risk metrics.
- **Process-Driven:** Relies on guided workflows to ensure accuracy.

Short Description

Arjun is a junior professional responsible for monitoring daily risk data and flagging inconsistencies. He needs an interface that translates complex financial math into clear, actionable status indicators.

Needs & Primary Device

- **Needs:** Simplified views, contextual help tooltips to explain metrics, and pre-built report templates.
- **Primary Device:** Desktop—he requires a full workstation for detailed data entry and multi-tab verification.

Challenges

- **Cognitive Load:** Information overload is his primary risk; he can easily get lost in dense data.
- **Metric Literacy:** Limited familiarity with advanced measures like Greeks or Monte Carlo simulations.
- **Interpretation:** Needs help knowing if a number is "good" or "bad" without deep manual analysis.

Opportunities

- **Progressive Disclosure:** Use the "Tier 1 Glance Layer" to show him only high-level status first.
- **Color-Coding:** Implement clear, semantic status indicators (Red/Amber/Green) that require minimal interpretation.
- **Onboarding:** Design a specific "First-Time User Flow" to help him navigate the platform.

Customer Journey Mapping

Persona 2
Sarah
(Senior Portfolio Manager)

Key Attribute

- High-efficiency, fast-paced, data-driven.

Short Description

10+ years of experience; manages billions in assets and makes real-time investment decisions.

Needs & Primary Device

- Maximum information density without clutter.
- Direct drill-down to position-level Greeks (Delta, Gamma, Theta, etc.)
- **Device:** Desktop for primary work; Tablet for portability.

Challenges

- Time-consuming navigation between screens.
- "Hidden" data behind too many clicks.

Opportunities

- Implement Keyboard Shortcuts (e.g., Ctrl+Shift+V for VaR) to speed up workflow.
- Use a 12-column grid on desktop to show 8–12 widgets simultaneously.

Customer Journey Mapping

Persona 3
Marcus
(Chief Risk Officer)

Key Attribute

- Strategic, time-poor, clarity-focused.

Short Description

C-suite executive; reports firm-wide risk status to the board and investors.

Needs & Primary Device

- "Traffic-light" status dashboards (Red/Amber/Green) for instant health checks.
- Exportable report formats (PDF/PPT) for presentations.
- **Device:** Tablet and Mobile for meetings and travel.

Challenges

- Getting overwhelmed by "granular weeds" of data.
- Needs to understand the impact of extreme market events (Stress Tests) quickly.

Opportunities

- Design the Tier 1 Glance Layer specifically for this persona's quick-look needs.
- Use Heat Maps for stress test results to show magnitude at a glance.

Customer Journey Mapping

Persona 4
Elena
(Compliance Officer)

Key Attribute

- Meticulous, rules-oriented, evidence-based.

Short Description

Background in regulation; ensures the firm stays within legal limits (Basel III/IV).

Needs & Primary Device

- Timestamped audit trails for every alert acknowledgement.
- Detailed breach history logs.
- **Device:** Desktop for detailed documentation and reporting.

Challenges

- Incomplete notes or missing reasons for risk limit breaches.
- Difficulty tracking which user took which action during a crisis.

Opportunities

- Enforce a Mandatory Comment Field (min 20 chars) in the alert acknowledgement workflow.
- Create a "Compliance View" that prioritizes Breach Logs over live market data.
